

Landlord User Acceptance Test

Product:	RentDirect rental marketplace
Application reviewed:	/Users/chris/Developer/Projects/serverbased/rentdirect/apps
Prepared date:	2026-07-28
Execution status values:	Not Run, Pass, Fail, Blocked, Retest Pass
Defect log:	Record failures in docs/uat_errors.pdf using the related UAT code

Purpose

This document provides a business-readable User Acceptance Test script for the RentDirect landlord journey. It verifies that real users can complete the workflow end to end, from registration and OTP verification through subscription, verification, property discovery or listing, rental payment, progress tracking, support, and account settings.

Scope

- Landlord registration, OTP verification, login, dashboard access, and session handling.
- Landlord subscription selection, payment, cancellation, and billing history.
- Individual and corporate landlord verification, listing creation, property verification choice, featured property payment, listing management, enquiries, tenant profile review, payment tracking, rental progress, support, and settings OTP.

Assumptions And Entry Criteria

- The test environment is available and points to the correct API and payment provider test configuration.
- Email delivery is working so OTP messages can be received by testers.
- At least one tenant and one landlord tester are available for cross-user chat, viewing, booking, and payment checks.
- Flutterwave or configured payment sandbox credentials are available for card and bank-transfer scenarios.
- Test identity numbers, bank details, listing images, and property documents are approved for test use only.

Execution Rules

- Mark each UAT code as Not Run, Pass, Fail, Blocked, or Retest Pass.
- If any expected result is not met, mark the test as Fail and record the issue in uat_errors.pdf using the same UAT code.
- Attach screenshots, payment references, email OTP timestamps, and downloaded receipts as evidence where available.
- Critical and High defects in registration, verification, subscriptions, bookings, payments, and rental progress must be fixed and retested before sign-off.

Test Cases

LL-UAT-001 - Landlord registration page opens

Status: [] Not Run [] Pass [] Fail [] Blocked [] Retest Pass Tester: _____ Date: _____

Objective: Confirm a new landlord can reach the registration journey and select landlord role.

Preconditions / test data: Tester is logged out and has a valid email inbox available for OTP.

Steps:

1. Open /register.
2. Review the registration form.
3. Select Landlord in the I am a section.

Expected result: Landlord option is selected and account registration fields remain clear and usable.

Actual result / evidence: _____

LL-UAT-002 - Create landlord account and request OTP

Status: [] Not Run [] Pass [] Fail [] Blocked [] Retest Pass Tester: _____ Date: _____

Objective: Verify that landlord account creation sends an email verification code.

Preconditions / test data: Use a unique landlord email address.

Steps:

1. Enter full name, email, and password.
2. Keep Landlord selected.
3. Click Create account.
4. Wait for the Verify your email screen.

Expected result: OTP verification screen appears and confirms the code was sent to the landlord email.

Actual result / evidence: _____

LL-UAT-003 - Verify landlord registration OTP

Status: [] Not Run [] Pass [] Fail [] Blocked [] Retest Pass Tester: _____ Date: _____

Objective: Confirm OTP verification activates the landlord account.

Preconditions / test data: Landlord registration OTP has been received and has not expired.

Steps:

1. Enter the six-character OTP.
2. Click Verify account.
3. Confirm user is signed in.
4. Open landlord dashboard.

Expected result: Landlord account is email verified and authenticated dashboard access is granted.

Actual result / evidence: _____

LL-UAT-004 - Landlord login and dashboard access

Status: [] Not Run [] Pass [] Fail [] Blocked [] Retest Pass Tester: _____ Date: _____

Objective: Confirm verified landlord can sign in and reach business dashboard.

Preconditions / test data: Landlord account is verified.

Steps:

1. Go to /login.
2. Enter landlord email and password.
3. Click Sign in.
4. Open landlord dashboard.

Expected result: Landlord dashboard loads with actions for Enquiries, Verification, Profile, Billing, Complaint, Support, Issues, Community Chat, Feedback, Settings, Featured, and Add Listing.

Actual result / evidence: _____

LL-UAT-005 - Choose landlord subscription plan

Status: [] Not Run [] Pass [] Fail [] Blocked [] Retest Pass Tester: _____ Date: _____

Objective: Confirm landlord can activate free or paid subscription access.

Preconditions / test data: Landlord is logged in.

Steps:

1. Open Billing.
2. Review landlord Bronze, Silver, Gold, and Platinum plans.
3. Select Bronze free plan or choose a paid monthly/yearly plan.
4. For paid plan, complete Flutterwave checkout or record pending result.

Expected result: Bronze activates immediately for 14 days. Paid plans create payment records and activate after successful payment verification.

Actual result / evidence: _____

LL-UAT-006 - Cancel or retry pending landlord subscription payment

Status: ☐ Not Run ☐ Pass ☐ Fail ☐ Blocked ☐ Retest Pass Tester: _____ Date: _____

Objective: Confirm landlord can resolve an interrupted subscription payment.

Preconditions / test data: Landlord has one pending paid subscription payment.

Steps:

1. Open Billing.
2. Find the Pending payment section.
3. Click Continue Payment.
4. Test Cancel and retry.
5. Test Completely Cancel Payment.

Expected result: Pending subscription payment state updates correctly and prevents selecting another plan until resolved.

Actual result / evidence: _____

LL-UAT-007 - Landlord verification status page loads

Status: ☐ Not Run ☐ Pass ☐ Fail ☐ Blocked ☐ Retest Pass Tester: _____ Date: _____

Objective: Confirm landlord can view identity, house document, and physical property verification statuses.

Preconditions / test data: Landlord is logged in.

Steps:

1. Open Verification from dashboard.
2. Review Verification Status cards.
3. Confirm Identity Verification, House Document Verification, and Physical Property Verification statuses are visible.

Expected result: Each verification category shows Unverified, Pending, or Verified with submitted date when available.

Actual result / evidence: _____

LL-UAT-008 - Submit individual landlord identity verification

Status: ☐ Not Run ☐ Pass ☐ Fail ☐ Blocked ☐ Retest Pass Tester: _____ Date: _____

Objective: Confirm an individual landlord can submit identity details and identification documents.

Preconditions / test data: Landlord has test biodata, 11-digit NIN, 11-digit BVN, bank details, address, and ID document file.

Steps:

1. Select Individual Landlord.
2. Click Verify Identity.
3. Complete personal information, NIN/BVN, contact number, email, residence, and bank details.
4. Upload identification document.
5. Submit verification.

Expected result: Required field validation works. Valid submission saves profile data, uploads documents, and changes Identity Verification to Pending or Verified.

Actual result / evidence: _____

LL-UAT-009 - Submit corporate landlord identity verification

Status: [] Not Run [] Pass [] Fail [] Blocked [] Retest Pass Tester: _____ Date: _____

Objective: Confirm a corporate landlord can submit company identity and banking information.

Preconditions / test data: Landlord account is not already locked to individual track; CAC, TIN, NIN, BVN, bank details, and ID document are available.

Steps:

1. Select Corporate Landlord.
2. Click Verify Identity.
3. Complete company name, business state/city/address, company phone/email, contact person, position, CAC number/date, TIN, NIN, BVN, and bank details.
4. Upload identification document.
5. Submit verification.

Expected result: Corporate fields validate, document uploads, and verification request is submitted with corporate landlord type saved.

Actual result / evidence: _____

LL-UAT-010 - Reject incomplete landlord verification

Status: [] Not Run [] Pass [] Fail [] Blocked [] Retest Pass Tester: _____ Date: _____

Objective: Confirm landlord verification cannot be submitted with missing or invalid fields.

Preconditions / test data: Landlord verification form is open.

Steps:

1. Select a landlord type.
2. Leave required fields blank.
3. Enter invalid NIN or BVN length.
4. Submit without identification document.
5. Read field errors.

Expected result: Submission is blocked, invalid fields show clear messages, and no verification request is submitted until corrected.

Actual result / evidence: _____

LL-UAT-011 - Block listing creation before identity verification

Status: [] Not Run [] Pass [] Fail [] Blocked [] Retest Pass Tester: _____ Date: _____

Objective: Confirm unverified landlords are guided to verification before listing.

Preconditions / test data: Landlord identity verification is Unverified or Pending.

Steps:

1. Open /listings/new or click Add Listing.
2. Observe verification requirement message.
3. Click Go to Verification.
4. Return to dashboard.

Expected result: Listing creation is blocked until required identification verification is complete and buttons route to the correct pages.

Actual result / evidence: _____

LL-UAT-012 - Create property listing with document verification

Status: [] Not Run [] Pass [] Fail [] Blocked [] Retest Pass Tester: _____ Date: _____

Objective: Confirm verified landlord can create a complete listing using uploaded property documents.

Preconditions / test data: Landlord identity is verified; cover image, additional images, and property document files are available.

Steps:

1. Click Add Listing.
2. Complete title, type, description, address, city, state, postal code, bedrooms, bathrooms, toilets, available date, annual rent, occupancy, duration, rental preferences, amenities, and features.
3. Select Upload documents as verification method.
4. Select ownership type and ownership document type.
5. Upload property documents, cover image, and additional images.
6. Click Create Listing.

Expected result: Listing is created, deposit is auto-calculated as 20 percent of annual rent, and the new listing detail page opens.

Actual result / evidence: _____

LL-UAT-013 - Create property listing with in-person verification

Status: [] Not Run [] Pass [] Fail [] Blocked [] Retest Pass Tester: _____ Date: _____

Objective: Confirm landlord can request physical verification instead of uploading property documents.

Preconditions / test data: Landlord identity is verified and listing test data/images are ready.

Steps:

1. Open Add Listing.
2. Complete all property and rental preference fields.
3. Choose In-person verification.
4. Confirm property document upload is disabled or optional.
5. Upload required listing images.
6. Click Create Listing.

Expected result: Listing is created with in-person verification requested and no property document upload is required.

Actual result / evidence: _____

LL-UAT-014 - Reject incomplete listing form

Status: [] Not Run [] Pass [] Fail [] Blocked [] Retest Pass Tester: _____ Date: _____

Objective: Confirm listing validation explains missing mandatory information.

Preconditions / test data: Landlord can access Add Listing.

Steps:

1. Open Add Listing.
2. Submit without cover image.
3. Submit without additional images.
4. Submit without amenities.
5. Submit without ownership details or property documents when document verification is selected.
6. Review errors.

Expected result: The listing is not created and each missing mandatory requirement is clearly explained.

Actual result / evidence: _____

LL-UAT-015 - Request featured property placement

Status: [] Not Run [] Pass [] Fail [] Blocked [] Retest Pass Tester: _____ Date: _____

Objective: Confirm landlord can request paid featured placement while creating a listing.

Preconditions / test data: Landlord is creating a new listing and payment provider test flow is available.

Steps:

1. Complete a new listing.
2. Tick I want to feature this property.
3. Submit the listing.
4. Confirm redirect to featured payment page.
5. Complete or record payment provider result.

Expected result: Featured payment request is created for 30 days and the listing becomes featured after successful payment confirmation.

Actual result / evidence: _____

LL-UAT-016 - Edit property listing

Status: [] Not Run [] Pass [] Fail [] Blocked [] Retest Pass Tester: _____ Date: _____

Objective: Confirm landlord can update an existing listing.

Preconditions / test data: Landlord has at least one listing.

Steps:

1. Open landlord dashboard.
2. Click edit icon on a property.
3. Change title, description, price, amenities, or images.
4. Click Save Changes.
5. Open listing detail.

Expected result: Updated information is saved and displayed on listing detail and dashboard.

Actual result / evidence: _____

LL-UAT-017 - Delete property listing

Status: [] Not Run [] Pass [] Fail [] Blocked [] Retest Pass Tester: _____ Date: _____

Objective: Confirm landlord can delete a listing after confirmation.

Preconditions / test data: Landlord has a test listing that can be removed.

Steps:

1. Open landlord dashboard.
2. Click delete icon.
3. Cancel the confirmation and confirm listing remains.
4. Click delete again and confirm.
5. Refresh dashboard.

Expected result: Cancel keeps the listing. Confirm removes the listing from the dashboard and public search.

Actual result / evidence: _____

LL-UAT-018 - View landlord public profile and properties

Status: [] Not Run [] Pass [] Fail [] Blocked [] Retest Pass Tester: _____ Date: _____

Objective: Confirm public landlord pages show profile, verification badges, metrics, listings, and reviews.

Preconditions / test data: Landlord has listings and profile data.

Steps:

1. From dashboard, open Profile.
2. Open View All Landlord Properties from a listing.
3. Review verification badges, metrics, listing status, reviews, and profile photo.

Expected result: Public profile and property pages load without exposing private verification raw data.

Actual result / evidence: _____

LL-UAT-019 - Receive tenant enquiry and continue chat

Status: [] Not Run [] Pass [] Fail [] Blocked [] Retest Pass Tester: _____ Date: _____

Objective: Confirm landlord can see tenant enquiries and respond.

Preconditions / test data: Tenant has sent a listing enquiry.

Steps:

1. Open Landlord Enquiries.
2. Review property, tenant, message count, last message, and viewing badge.
3. Click Continue Chat.
4. Send a reply to the tenant.

Expected result: Chat history loads with tenant information, reply is sent, and conversation updates in enquiries.

Actual result / evidence: _____

LL-UAT-020 - View tenant profile and screening signal

Status: [] Not Run [] Pass [] Fail [] Blocked [] Retest Pass Tester: _____ Date: _____

Objective: Confirm landlord can inspect permitted tenant profile details and screening category scores.

Preconditions / test data: Tenant has a profile and a booking/enquiry tied to landlord property.

Steps:

1. Open Landlord Enquiries or dashboard booking.
2. Click View Tenant Profile.
3. Review tenant public profile details.
4. Return to dashboard and review tenant screening score/category display if available.

Expected result: Allowed tenant information is visible, raw sensitive verification data remains hidden, and screening scores are understandable.

Actual result / evidence: _____

LL-UAT-021 - Track tenant rental request and payment status

Status: [] Not Run [] Pass [] Fail [] Blocked [] Retest Pass Tester: _____ Date: _____

Objective: Confirm landlord dashboard shows bookings, collected payments, expected payments, and balances.

Preconditions / test data: Tenant has created a booking and made at least one payment or pending payment.

Steps:

1. Open landlord dashboard.
2. Review Total Properties, Rental Requests, Collected Payments, Expected Payment, and Balance Payment.
3. Open Tenant Payments section.
4. Review total, collected, expecting, balance, booking status, tenant details, and action buttons.

Expected result: Financial amounts match booking/payment state and update after tenant payment confirmation.

Actual result / evidence: _____

LL-UAT-022 - Track landlord rental progress

Status: [] Not Run [] Pass [] Fail [] Blocked [] Retest Pass Tester: _____ Date: _____

Objective: Confirm landlord can record move-in workflow milestones in order.

Preconditions / test data: Booking exists for landlord property.

Steps:

1. Open landlord dashboard.
2. Click Rental Progress for a booking.
3. Tick and save steps sequentially: Viewing appointment booked, House Viewed, Tenancy agreement signed, deposit notification received, full payment notification received, check-in inventory completed, tenant collected key, bank/email notification of total rent received.
4. Attempt to tick a locked future step.

Expected result: Progress percentage updates, saved steps lock with date/time, future steps remain locked until earlier steps are complete.

Actual result / evidence: _____

LL-UAT-023 - Landlord support, issue, complaint, community, and feedback

Status: [] Not Run [] Pass [] Fail [] Blocked [] Retest Pass Tester: _____ Date: _____

Objective: Confirm landlord operational support channels work.

Preconditions / test data: Landlord is logged in; community chat requires eligible plan where applicable.

Steps:

1. Open Support and submit a support item.
2. Open Support Chat and send a message.
3. Open Complaint and submit a complaint.
4. Open Issues and submit an issue.
5. Open Community Chat and confirm access control.
6. Open Feedback and submit feedback.

Expected result: Each channel confirms success or shows a clear subscription/access message without losing entered content.

Actual result / evidence: _____

LL-UAT-024 - Landlord settings OTP and logout

Status: [] Not Run [] Pass [] Fail [] Blocked [] Retest Pass Tester: _____ Date: _____

Objective: Confirm sensitive landlord settings changes require OTP and logout clears the session.

Preconditions / test data: Landlord is logged in with access to email inbox.

Steps:

1. Open Settings.
2. Request OTP for a sensitive change.
3. Enter invalid OTP and observe error.
4. Enter valid OTP and save.
5. Log out.
6. Try opening landlord dashboard again.

Expected result: Invalid OTP is rejected, valid OTP completes the change, logout clears session, and protected dashboard requires login.

Actual result / evidence: _____

UAT Sign-Off

The Landlord UAT cycle is accepted when all mandatory tests are Pass or have approved business sign-off, no Critical or High defects remain open, and payment/verification defects have been retested successfully.
