

Tenant User Acceptance Test

Product:	RentDirect rental marketplace
Application reviewed:	/Users/chris/Developer/Projects/serverbased/rentdirect/apps
Prepared date:	2026-07-28
Execution status values:	Not Run, Pass, Fail, Blocked, Retest Pass
Defect log:	Record failures in docs/uat_errors.pdf using the related UAT code

Purpose

This document provides a business-readable User Acceptance Test script for the RentDirect tenant journey. It verifies that real users can complete the workflow end to end, from registration and OTP verification through subscription, verification, property discovery or listing, rental payment, progress tracking, support, and account settings.

Scope

- Tenant registration, OTP verification, login, dashboard access, and session handling.
- Tenant subscription selection, payment, cancellation, and billing history.
- Tenant identity verification, tenant profile, property search, favourites, listing details, landlord profile, viewing request, chat, booking, rental payment, receipts, rental progress, reviews, support, and settings OTP.

Assumptions And Entry Criteria

- The test environment is available and points to the correct API and payment provider test configuration.
- Email delivery is working so OTP messages can be received by testers.
- At least one tenant and one landlord tester are available for cross-user chat, viewing, booking, and payment checks.
- Flutterwave or configured payment sandbox credentials are available for card and bank-transfer scenarios.
- Test identity numbers, bank details, listing images, and property documents are approved for test use only.

Execution Rules

- Mark each UAT code as Not Run, Pass, Fail, Blocked, or Retest Pass.
- If any expected result is not met, mark the test as Fail and record the issue in uat_errors.pdf using the same UAT code.
- Attach screenshots, payment references, email OTP timestamps, and downloaded receipts as evidence where available.
- Critical and High defects in registration, verification, subscriptions, bookings, payments, and rental progress must be fixed and retested before sign-off.

Test Cases

TNT-UAT-001 - Tenant registration page opens

Status: [] Not Run [] Pass [] Fail [] Blocked [] Retest Pass Tester: _____ Date: _____

Objective: Confirm a new tenant can reach the registration journey and see the Tenant role option.

Preconditions / test data: Tester is logged out and has a valid email inbox available for OTP.

Steps:

1. Open the RentDirect web application.
2. Select Create account or go to /register.
3. Confirm the form shows Full name, Email address, Password, and I am a Tenant or Landlord.
4. Select Tenant.

Expected result: The Tenant option is selected, the form remains usable, and no landlord-only fields are

shown.

Actual result / evidence: _____

TNT-UAT-002 - Create tenant account and request OTP

Status: [] Not Run [] Pass [] Fail [] Blocked [] Retest Pass Tester: _____ Date: _____

Objective: Verify that tenant account creation sends an email verification code.

Preconditions / test data: Use a unique email address that is not already verified in RentDirect.

Steps:

1. Enter full name, tenant email, and password.
2. Keep Tenant selected.
3. Click Create account.
4. Wait for the verification screen.

Expected result: The page changes to Verify your email, shows the target email, and states that a code was sent.

Actual result / evidence: _____

TNT-UAT-003 - Verify tenant registration OTP

Status: [] Not Run [] Pass [] Fail [] Blocked [] Retest Pass Tester: _____ Date: _____

Objective: Confirm OTP verification activates the tenant account and signs the user in.

Preconditions / test data: Tenant registration OTP has been received and has not expired.

Steps:

1. Enter the six-character OTP exactly as received.
2. Click Verify account.
3. Observe the next page after verification.
4. Confirm the user session is active.

Expected result: OTP is accepted, the account is email verified, and the tenant is redirected into the authenticated experience.

Actual result / evidence: _____

TNT-UAT-004 - Reject invalid or expired tenant OTP

Status: [] Not Run [] Pass [] Fail [] Blocked [] Retest Pass Tester: _____ Date: _____

Objective: Confirm the system clearly handles wrong verification codes.

Preconditions / test data: A tenant registration OTP screen is open.

Steps:

1. Enter an incorrect six-character OTP.
2. Click Verify account.
3. Read the error message.
4. Repeat until remaining-attempt messaging is visible if supported.

Expected result: The account is not verified, a clear error is displayed, and the tester can request or restart registration when needed.

Actual result / evidence: _____

TNT-UAT-005 - Tenant login and dashboard access

Status: [] Not Run [] Pass [] Fail [] Blocked [] Retest Pass Tester: _____ Date: _____

Objective: Confirm a verified tenant can sign in and land on the tenant dashboard.

Preconditions / test data: Tenant account is verified.

Steps:

1. Go to /login.
2. Enter tenant email and password.
3. Click Sign in.
4. Open the tenant dashboard from the post-login route if not redirected automatically.

Expected result: Tenant dashboard loads with actions for Search, Favourites, Enquiries, Verification, Profile, Billing, Support, Community Chat, Feedback, and Settings.

Actual result / evidence: _____

TNT-UAT-006 - Choose tenant subscription plan

Status: [] Not Run [] Pass [] Fail [] Blocked [] Retest Pass Tester: _____ Date: _____

Objective: Confirm tenant can activate a plan and understand access limits.

Preconditions / test data: Tenant is logged in.

Steps:

1. Open Billing from the dashboard.
2. Review Bronze, Silver, Gold, and Platinum tenant plans.
3. Select Bronze monthly for free access or choose a paid plan for full rental actions.
4. For a paid plan, continue to subscription payment and complete or record provider checkout result.

Expected result: Bronze activates immediately for 14 days. Paid plans create a pending payment, launch Flutterwave checkout, and become active after successful payment verification.

Actual result / evidence: _____

TNT-UAT-007 - Cancel or retry pending tenant subscription payment

Status: [] Not Run [] Pass [] Fail [] Blocked [] Retest Pass Tester: _____ Date: _____

Objective: Confirm interrupted subscription payments can be managed without duplicate pending plans.

Preconditions / test data: Tenant has one pending paid subscription payment.

Steps:

1. Open Billing.
2. Locate the Pending payment section.
3. Click Continue Payment and confirm checkout resumes.
4. Return and test Cancel and retry or Completely Cancel Payment.

Expected result: Only one pending subscription attempt is active; continuing, retrying, and cancellation show clear outcomes and update billing history.

Actual result / evidence: _____

TNT-UAT-008 - Complete tenant identity verification

Status: [] Not Run [] Pass [] Fail [] Blocked [] Retest Pass Tester: _____ Date: _____

Objective: Confirm tenant can submit biodata, NIN, and BVN verification details.

Preconditions / test data: Tenant is logged in and has test biodata, 11-digit NIN, 11-digit BVN, and mobile number.

Steps:

1. Open Verification from the dashboard or /verify.
2. Complete first name, last name, country/date of birth, gender, nationality, state, LGA, email, mobile, employment status, NIN, and BVN.
3. Click Submit Verification.
4. Confirm success dialog or status message.

Expected result: Required validation prevents incomplete data. Valid data is saved, verification succeeds or is submitted for review, and the tenant can proceed to profile/search actions.

Actual result / evidence: _____

TNT-UAT-009 - Reject invalid tenant verification data

Status: [] Not Run [] Pass [] Fail [] Blocked [] Retest Pass Tester: _____ Date: _____

Objective: Confirm validation explains bad NIN, BVN, mobile, and missing fields.

Preconditions / test data: Tenant verification page is open.

Steps:

1. Leave one required field blank.
2. Enter fewer than 11 digits in NIN or BVN.
3. Enter an invalid mobile number.
4. Click Submit Verification.

Expected result: The form stays on screen, each invalid field shows a readable message, and no verification request is submitted until data is corrected.

Actual result / evidence: _____

TNT-UAT-010 - Create or update tenant profile details

Status: [] Not Run [] Pass [] Fail [] Blocked [] Retest Pass Tester: _____ Date: _____

Objective: Confirm tenant can complete the reusable rental profile after verification.

Preconditions / test data: Tenant is logged in; profile route is available from dashboard.

Steps:

1. Open Profile.
2. Enter residence, employment, financial, guarantor, landlord, rental history, household, social presence, and declaration information where required.
3. Save changes.
4. Reopen the profile.

Expected result: Profile data persists, saved values are visible after reload, and missing required sections are clearly identified.

Actual result / evidence: _____

TNT-UAT-011 - Search and filter available properties

Status: [] Not Run [] Pass [] Fail [] Blocked [] Retest Pass Tester: _____ Date: _____

Objective: Confirm tenant can browse listings using search, location, price, room, and feature filters.

Preconditions / test data: At least one active listing exists.

Steps:

1. Open Search.
2. Search by keyword.
3. Filter by state, city, radius, price range, property type, bedrooms, bathrooms, toilets, furnished, pet friendly, and utilities included.
4. Click Apply/Search.
5. Open location analytics if required.

Expected result: Matching listings appear, URL filters update, empty results are understandable, and location permission failures show a readable message.

Actual result / evidence: _____

TNT-UAT-012 - Save and remove favourite property

Status: [] Not Run [] Pass [] Fail [] Blocked [] Retest Pass Tester: _____ Date: _____

Objective: Confirm a tenant can manage favourite listings.

Preconditions / test data: Tenant is logged in and viewing a property detail page.

Steps:

1. Open any listing.
2. Click Add to Favourites.
3. Open Favourites from dashboard.
4. Confirm the property appears.
5. Return to the listing and click Remove from Favourites.

Expected result: Favourite state updates immediately and remains correct after page refresh.

Actual result / evidence: _____

TNT-UAT-013 - View listing details and landlord profile

Status: [] Not Run [] Pass [] Fail [] Blocked [] Retest Pass Tester: _____ Date: _____

Objective: Confirm tenant can inspect listing media, rental terms, location, reviews, and landlord profile.

Preconditions / test data: Listing exists with cover image, additional images, landlord profile, and pricing.

Steps:

1. Open a listing from Search.
2. Cycle through main image and thumbnails.
3. Review rent, deposit, bedrooms, bathrooms, toilets, features, amenities, address or state, map, reviews, and landlord information.
4. Click View Landlord Profile and View All Landlord Properties.

Expected result: All visible property information is accurate; Bronze tenants see restricted location details while paid tenants see full location/map and available amenities.

Actual result / evidence: _____

TNT-UAT-014 - Arrange viewing by messaging landlord

Status: [] Not Run [] Pass [] Fail [] Blocked [] Retest Pass Tester: _____ Date: _____

Objective: Confirm eligible tenant can request a viewing through the protected chat.

Preconditions / test data: Tenant is verified and on Silver, Gold, or Platinum plan.

Steps:

1. Open a listing.
2. Click Arrange viewing.
3. Enter viewing availability.
4. Enter a message without phone numbers, email addresses, or social media handles.
5. Click Send.

Expected result: Message is sent, availability is included, conversation appears in My Enquiries, and contact information is blocked with a clear warning if entered.

Actual result / evidence: _____

TNT-UAT-015 - Continue tenant enquiry conversation

Status: [] Not Run [] Pass [] Fail [] Blocked [] Retest Pass Tester: _____ Date: _____

Objective: Confirm tenant can return to and continue landlord conversations.

Preconditions / test data: At least one landlord enquiry conversation exists.

Steps:

1. Open Enquiries from dashboard.
2. Review property, landlord, last message, message count, and viewing badge.
3. Click Continue Chat.
4. Send a follow-up message.

Expected result: Conversation history loads and the new message appears in the thread.

Actual result / evidence: _____

TNT-UAT-016 - Start rent application from listing

Status: [] Not Run [] Pass [] Fail [] Blocked [] Retest Pass Tester: _____ Date: _____

Objective: Confirm tenant can create a booking for a selected property.

Preconditions / test data: Tenant is verified and has a paid plan; listing is available.

Steps:

1. Open listing detail.
2. Click Rent Now.
3. Review property details and rental terms.
4. Accept or confirm any required terms.
5. Create rental application if prompted.

Expected result: A booking is created for the listing and the Rent This Property page shows payment options and calculated amounts.

Actual result / evidence: _____

TNT-UAT-017 - Pay 20 percent rental deposit

Status: [] Not Run [] Pass [] Fail [] Blocked [] Retest Pass Tester: _____ Date: _____

Objective: Confirm tenant can reserve a property with the optional 20 percent deposit.

Preconditions / test data: Booking exists with no paid amount and deposit option is shown.

Steps:

1. On Rent This Property, select Pay 20% Deposit.
2. Choose Bank Transfer or Card.
3. Click Pay.
4. For bank transfer, record virtual account details; for card, complete hosted checkout.
5. Return to RentDirect after provider confirmation.

Expected result: Payment is created, pending/processing state is visible until confirmed, and the booking paid amount updates after successful payment verification.

Actual result / evidence: _____

TNT-UAT-018 - Pay full rental balance

Status: [] Not Run [] Pass [] Fail [] Blocked [] Retest Pass Tester: _____ Date: _____

Objective: Confirm tenant can complete the remaining rental payment.

Preconditions / test data: Booking exists with remaining balance.

Steps:

1. Open the booking from Tenant Dashboard or /rent/{listingId}.
2. Select Pay Full Balance.
3. Choose allowed payment method.
4. Complete provider payment or bank transfer.
5. Refresh booking details.

Expected result: Remaining balance becomes zero after successful payment. Dashboard shows paid amount and no outstanding balance for the booking.

Actual result / evidence: _____

TNT-UAT-019 - Continue or cancel pending rental payment

Status: [] Not Run [] Pass [] Fail [] Blocked [] Retest Pass Tester: _____ Date: _____

Objective: Confirm tenant can resolve an interrupted rental payment.

Preconditions / test data: A booking has a pending or processing payment.

Steps:

1. Open Rent This Property for the listing.
2. Locate Payment In Progress.
3. Click Continue Payment and verify checkout resumes.
4. Cancel a pending payment and confirm warning dialog.
5. For completed payment cancellation, confirm refund messaging appears where allowed.

Expected result: Pending payments can be continued or cancelled, duplicate open payments are prevented, and completed payment cancellation follows the refund rules.

Actual result / evidence: _____

TNT-UAT-020 - Download rental payment receipt

Status: [] Not Run [] Pass [] Fail [] Blocked [] Retest Pass Tester: _____ Date: _____

Objective: Confirm tenant can download receipt for completed payment.

Preconditions / test data: Booking contains at least one completed rental payment.

Steps:

1. Open Rent This Property.
2. Locate completed payment history or receipt action.
3. Click Download receipt.
4. Open the downloaded PDF.

Expected result: Receipt PDF downloads and contains transaction, property, tenant, landlord, amount, method, and date details.

Actual result / evidence: _____

TNT-UAT-021 - Track tenant rental progress

Status: [] Not Run [] Pass [] Fail [] Blocked [] Retest Pass Tester: _____ Date: _____

Objective: Confirm tenant can record move-in workflow milestones in order.

Preconditions / test data: Booking exists and tenant is logged in.

Steps:

1. Open Tenant Dashboard.
2. Click Rental Progress for the booking.
3. Tick Viewing appointment booked and save.
4. Continue sequentially through House Viewed, Tenancy agreement signed, Tenant has paid Deposit, Tenant has paid rent in full, Check-in inventory completed, Tenant collected House Key, Can RentDirect transfer rent amount to Landlord, and final email received.
5. Try selecting a later locked step before previous steps are complete.

Expected result: Progress percentage updates after save, completed steps lock with date/time, later steps remain locked until prerequisites are complete, and the transfer step requires Yes or No.

Actual result / evidence: _____

TNT-UAT-022 - Review property after rental interaction

Status: [] Not Run [] Pass [] Fail [] Blocked [] Retest Pass Tester: _____ Date: _____

Objective: Confirm eligible tenant can submit or edit a property review.

Preconditions / test data: Tenant is on Gold or Platinum or otherwise has review access.

Steps:

1. Open a listing.
2. Click Review Property.
3. Select rating and enter comment.
4. Submit review.
5. Reopen listing and edit the review.

Expected result: Review is saved, visible in Property Reviews, and can be edited by the same tenant.

Actual result / evidence: _____

TNT-UAT-023 - Raise support, issue, complaint, and feedback

Status: [] Not Run [] Pass [] Fail [] Blocked [] Retest Pass Tester: _____ Date: _____

Objective: Confirm tenant operational support channels work end to end.

Preconditions / test data: Tenant is logged in.

Steps:

1. Open Support and submit a support item.
2. Open Support Chat and send a message.
3. Open Complaint and submit a complaint.
4. Open Issues and submit an issue.
5. Open Feedback and submit feedback.

Expected result: Each submission confirms success or appears in its relevant list/thread without losing user input.

Actual result / evidence: _____

TNT-UAT-024 - Tenant settings OTP and logout

Status: [] Not Run [] Pass [] Fail [] Blocked [] Retest Pass Tester: _____ Date: _____

Objective: Confirm sensitive settings changes require OTP and the user can end the session.

Preconditions / test data: Tenant is logged in with access to the email inbox.

Steps:

1. Open Settings.
2. Request OTP for an email, password, or account setting change.
3. Enter invalid OTP and observe error.
4. Enter valid OTP and save the change.
5. Log out and confirm protected pages require login.

Expected result: Invalid OTP is rejected, valid OTP completes the change, and logout clears access to protected tenant routes.

Actual result / evidence: _____

UAT Sign-Off

The Tenant UAT cycle is accepted when all mandatory tests are Pass or have approved business sign-off, no Critical or High defects remain open, and payment/verification defects have been retested successfully.
